Project Profile: Alston & Bird

More than just products, we create solutions.

in this case, the solution came in the form of a table frame and base to give new life to the pre-existing marble table tops already used throughout.

CONFERENCE
5007

Providing furniture solutions goes beyond what was originally quoted for a job. While working on this particular job there was a recognized need to update the cafeteria tables. For this CCN sourced 1 sq. meter italian porcelain for the tops which was then captured by a beveled aluminum extrusion. The original table bases were refinished and reused for an updated look and a cost savings which was passed on to the client.
