AERO COLLECTION

AERO COLLECTION | designed by Q Design

The AERO design language is characterized by sleek cantilevered surfaces and supporting beveled planes composed in either contrasting monolithic fine wood or neutral colored finishes. This design is thoughtfully applied throughout a comprehensive collection of Conference Tables, Desks, and supporting Storage elements.

We hope you are inspired by the unique attributes of this design as you seek new solutions for your projects.

While we have expressed a range of possibilities we acknowledge the uniqueness of each clients needs.

Project requirements can't always be met with off the shelf products. CCN prides itself on finding solutions from simple to complex.

For over forty years we have built our reputation and business working with each of our clients to tailor our product platforms to better fit a wide variety of unique requirements.

Each of our product platforms is developed with a proven architectural logic for construction and performance based on insights we have gained through thousands of projects. We do this by anticipating the breadth of tailored solutions that our clients require.

Gracefully integrated amenities provide a complete well thought out result.

The process does not have to start with a blank piece of paper. Our platforms, design details, and finish options are developed with your space in mind.

With this approach we can easily accommodate your requests
and efficiently deliver a unique solution.

We will work with you to configure these elements into an executable end result that WOWS the end user.

Customized results. And, a great experience getting there.

This is the CCN difference.

Call us to get the process started. We love a challenge and hope you give us the opportunity to work on something special for you.
