About CCN

Founded in 1985, CCN merged the talents of partners with a strong foundation in custom/OEM manufacturing and sales/marketing expertise. Concentrating on the manufacture of wood casegoods for corporate and institutional environments, CCN has developed a solid reputation for both innovation and quality. Headquartered in the heart of Upstate New York's Finger Lakes region, CCN benefits from the local heritage of fine woodworking, having been a center for both the American Arts and Crafts movement in the early 1900's and a mecca for the Studio Arts in the 60's and 70's. CCN's manufacturing facility merges state of the art computer controlled machinery with time honored hand craftsmanship, taking full advantage of the best each has to offer.

As more and more and more manufacturers convert to "flat line" componentization (essentially a kit of parts), CCN continues to provide heirloom quality case pieces constructed with dovetail and mitered joinery.

Long respected for the quality and manner in which wood veneer panels are implemented in their furniture, CCN hand selects the highest quality veneers and lays them up in house to ensure the finest results. CCN approaches all orders on a per-project basis, selecting materials specifically for that project, then making certain that all veneer panels are not only sequenced, centered and balanced for each individual piece of furniture, but for the complete order, whether it be one room or fifty.

This expertise in the execution of veneers is complemented by a similar attention to high quality construction, craftsmanship of solid wood elements, state of the art finishes and the integration of other material such as metal or stone. Our ability to accommodate office technology includes sit-to-stand work surfaces as well as wiring solutions, power/data connections, video lifts, keyless locking, etcetera. Accommodating modifications to standard product has been an integral part of the CCN success strategy from day one.

This overview Price List provides a glimpse of CCN's product scope and capabilities. All product categories are more thoroughly presented on the CCN website. For more on the full breadth of CCN's offerings, information regarding discounts or for product modification inquiries, contact your local CCN representative, our customer service group at 315-789-4400, or visit us on the web at www.ccnintl.com

FOUNDATION

FOUNDATION products feature 1-1/2" thickness full overlay wood tops in conjunction with a variety of wood casepiece components and backwalls. Standard edge treatment is square profile with 1/16" edgebanding. Alternate edge treatments are available, quoted upon request. Adjoining worksurfaces are connected via butt joints with concealed alignment tabs and hidden steel mending plates. Prices reflect a standard CCN finish on flat cut cherry maple, or walnut. Other species and finishes quoted upon request.

CCN's standard finishing system is based on a unique and up to date eco-friendly system of lightfast dyes and high strength pigments. This allows for excellent color matching capabilities while also offering exceptional clarity and high definition of natural character. This finish is then sealed and topcoated with a UV resistant cross-linked high solids coating which is highly resistant to household chemicals and yellowing as well as being mar resistant.

The underside of worksurfaces and backs of some storage units are "unfinished". Secondary grade veneer, black sealer paper, or a sprayed on high solids sealer is applied to enhance dimensional stability. Storage units include hi-rises, tall storage, towers, anchors, spanner cabinets, wall hung and stanchion mounted cabinets, book-cases, pedestals, and lateral files.

An exit hole is provided in the back of all high-rises to accommodate task light wiring. As a result, tackboards are not required to conceal wiring. The backs of wall hung and spanner storage units are recessed by 3/4" to accommodate wiring as well as concealed wall hanging cleats. Standard tackboard fabric is Gilford Anchorage 2335. Alternate or COM fabrics will be quoted upon request.

Wire access grommets or any other aesthetic modifications are considered an option and will be quoted upon request.

Standard pulls are rectilinear "loop" configuration in matte silver or polished chrome and are **4-1/8" or 9-1/8" (x 1-1/8" x 3/8")** depending on application. Alternate pull styles quoted on request.

FOUNDATION

Sit-To-Stand adjustable height worksurfaces can be specified as a freestanding table desk, freestanding desk with one or two pedestals, casegoods integrated into a return or credenza assembly, or as a runoff desk that is integrated with a return at one side and freestanding at the other.

Height adjustment range is from 29-1/2" to 45-5/8". A wire management trough and a flexible wire manager are both included, as is a programmable controller.

Stanchion-Mounted Overheads utilize concealed steel posts to support overhead cabinets and backwalls, eliminating the requirement for overhead end panels. The result is an appearance of wall mounted overhead cabinetry without the need for blocking within a wall or expensive repair to walls at a later date. Stanchion mounted overheads must be used in conjunction with stanchion mount credenzas. Stanchions posts, hat channels, and fabric clad tackboards are included when ordering stanchion mount overheads.
