It is said that the details make the product, and **Site** certainly has many details.

- casegood and storage elements incorporate a mitered assembly
- integrated finger pull on doors and drawers
- casegood bodies receive a border that encapsulates the doors on 3 sides
- metal bases are welded on a miter using 2" square stainless steel tubing
- a 1/4" reveal separates the metal bases from tables tops and casegood bodies

SITE RECAP

workplace

- designed for open, private, and collaborative spaces
- minimal part count- no removable panels, no door pulls or handles
- low sight lines to promote transparency and collaboration
- use of mixed materials- wood, brushed nickel steel, felt and Corian
- minimalist design approach, subtle details
